GREEN DESIGN

**Bonnie Lancaster & Keffie Lancaster, Lancaster-Humma-White Studio:
Living Room**

Luscious color streams down these 22-foot walls, perhaps to the sound of romantic music from the noire piano in this urbane Bird Key living room. The custom wall treatment, which required eight different coats of paints and glazes, was inspired by a collection of kiwi glazed ceramic flowerpots prized by the homeowner. The lightness of the mirrored coffee table beautifully offsets the gravity of the piano, while kiwi green silk plaid pillows on the English armchairs cheerfully reinforce the color theme in an offhand way. This exceptional room is both timeless and modern, an operatic aria of green that could make any home sing.
